

# Product Backlog

for the Frontend Movie Management Module  
in the 'Movie Recommendation System' Project

High priority

Low priority

Task	Priority
As a user, I can access the main interface and use the search function	1
As an admin, I can access the control panel integrated in the web application	1
As an admin, I can use the control panel's functions (add/remove movie, whitelist/blacklist account, etc.)	2
As an admin or as a user, I can use the application in its barebones form via the specific routings to the backend	2
As a user, I can add movies to my preference list and view my preference list, receiving recommendations based on it	3
As a user, I can use the 'Compare Movies' menu in order to compare two movies (by recommendations for me)	4
As a user, I can view the Top 10 movies at the current time in the main application panel	5
As a user, I can view my watched movies history	6
As a user or administrator, I can change the app's theme from the 'Settings' menu	7
As a user, I can see a list of upcoming movies and their matching percentage for my tastes	8
As a user, I can view more information about a specific movie in a built-in browser panel (or external)	9
